

Quality Policy

The management of First National Battery is committed to producing and supplying automotive and industrial lead acid batteries that are reliable in operation, safe, on time and which meet the specifications and quality requirements of our valued customers.

To this end, First National Battery management and employees will strive to continually improve the effectiveness of our Business Management System.

Annually realistic business objectives are set by management and reviewed for ongoing suitability as required. Where objectives are not being realised, the objective will be reviewed and actions implemented. Further subsequent monitoring and review of these objectives will be conducted to determine the effectiveness of the implemented actions.

All managers must ensure that the Business Management System objectives have been communicated and understood by the relevant employees in a manner that will enable all employees to contribute optimally towards the achievement of these objectives.

Dr Louis Denner.
Managing Director
