Energy Policy - First National Battery

The management and employees of First National Battery, are committed to maintaining and continually improving the organization's energy performance of all energy streams and in all company facilities, to promote the long-term environmental and economic sustainability of its battery design, manufacturing, distribution and recycling activities so as to benefit all its stakeholders.

- Communicating the policy to all levels of First National Battery and to develop strategic initiatives to ensure alignment attitudes and behaviour to the policy.
- Reducing our total energy consumption per year and commit to continual improvement in energy performance.
- Ensuring continual improvement in our energy performance in reducing waste and optimising water and materials resource usage.
- Deploying information including effective metering and supporting software system.
- Employing resources to identify areas for improvement and achieve our objectives and targets in energy projects implementations.
- Upholding legal and other requirements regarding energy.
- Considering energy performance improvements in *design, purchasing of energy-efficient products* and modification of our facilities, equipment, systems and processes.
- To reviewing and updating this energy policy regularly.
